

PRESS RELEASE

QGroup announces the appointment of a new distributor in South Africa

Frankfurt and Muscat, June 6th, 2013 – QGroup GmbH is announcing today that it has signed a partnership with Unicus Solu(IT)ons (Pty) Ltd, a 100% Black Owned Company, to distribute the QTrust family of high security products for secure remote access and secure data communications, including its flagship QTrust 2go authentication solutions.

Unicus will support QGroup's international presence as a value added reseller and add the QTrust line of presence products to its expanding portfolio of IT services and solutions offered to new and existing clients. Having been sold IT security solutions for more than 2 years this partnership is the logical next step for Unicus to share these high security solutions with its customers. In addition to QGroup's powerful Trusted Operating System based QTrust Server and QTrust 2go Life, the only 3-factor remote secure access solution with fingerprint on a secure token available on the market today. Unicus and its customers will also benefit from the recent introduction of the newest member of the QTrust 2go family, Smart. This business authentication solution provides a facial scan via smartphone as a third factor, and caused a sensation at the 2012 CeBIT in Hannover, Germany.

By expanding its international market coverage and product portfolio at a time security breaches are increasing both internally and from the outside, QGroup is building on a momentum to replace legacy intrinsically weak security approaches by a new paradigm based on strong physical authentication, highly secure data centres, and trusted operating system security. "With Unicus, we now have a strong and competent partner that already understands the benefits of IT Security 2.0 and shares the goals of building end to end IT services that include security at its core", says Thomas Blumenthal, Global Managing Director, QGroup.

About UNICUS Solu(IT)ons

UNICUS Solu(IT)ons (Pty) Ltd is a black owned South African Information and Communication Technology (ICT) company that provides services and solutions to clients in both government and the private sector. UNICUS' business focus is based on the premise that today more than ever businesses need integrated management solutions that enable them to manage all elements of their complex enterprise resources. UNICUS Solu(IT)ons was established in 2003 by Jabu Sibanda who holds a 100% share of the company. Since its inception, Jabu and his Management Team have been the main drivers of the development and growth of the company and moreover the most active participants.

About QGroup

Founded in 1993, QGroup provides a predictable framework for trusted use of information and communication technology. For over 20 years, QGroup has established itself as a manufacturer of reliable solutions in IT security. Under the name QTrust, the company sells products to ensure maximum data protection and ease of use. QGroup is a member of the IT security association TeleTrusT Germany with high-security conscious clients.
